Dedication

The Dedication for a thesis paper is the part where the author mentions every name and relation which inspired them to complete the research paper—either personally and/or professionally. The dedication page is optional for authors who would like to offer their research to certain people, organization, or causes. This part is limited to a maximum of five sentences.

Acknowledgement

The Acknowledgment section is optional for students who want to recognize people or institutions that were instrumental to the completion of the thesis. This is where the author acknowledges the need to thank the aforementioned groups or individuals for helping with the project. It is limited to half a page.

[1.5 spacing, Align left, Arial , Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]

Abstract

An abstract is a shortened summary of the thesis. It is a one double-spaced paragraph of not more than 250 words; the abstract should concisely explain the content and structure of the paper and summarize its key or major findings. Do not use section numbers within the abstract (same with the heading). Information and conclusions not stated in the paper, references to other literature, exact phrase of the title, and illustrative elements such as figures and tables should not be included in an abstract.

Keywords: Provide up to 4 keywords (maximum) to use in online search on a separate line right after the Abstract.

CHAPTER 1: BACKGROUND OF THE STUDY

[Students are free to customize the layout and page break for each chapter, as long as it is consistent and professional-looking]

[Page breaks shall not contain headers and footers]

[Students are free to customize the header and footer of their paper, as long as it is consistent and professional-looking]

1.1 Rationale

[For all headings: Times New Roman, Font size 12, Bold]

A thesis is a document that is required to be submitted to complete an academic degree or a professional qualification to present the research and findings of an author. It is used for a part of a bachelor's or master's course.

[One 1.5 space between each paragraph]

A thesis must embody an original and significant research or creative work; show the student's capacity to make a critical evaluation of previous work done in his/her chosen topic; and demonstrate his/her ability to present research findings in a clear, systematic, and scholarly manner.

[One 1.5 space between each paragraph]

The term thesis is often confused with dissertation. The dissertation is a different form of assessment used for a doctorate degree. The topic for dissertation is chosen to embody an original, independent, and significant scientific research or creative work.

[One 1.5 space between each paragraph]

The Background of the Study introduces how the current study relates to other studies that have preceded it. The Foreword which gives an introduction to the group of works that have been made for the year (contents for this part can be requested from the thesis faculty) can already be integrated into the Chapter 1 Introduction.

1.2 Statement of the Problem

1.2.1 Main Problem

The Main Problem gives the broad scope of the problem area. This also states the primary issues that need to be addressed by the thesis.

[1.5 spacing, Justified, Times New Roman, Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 heading]

1.2.2 Sub-Problems

2.2.2.1 Problems arising from the main problem.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0.0 bullet]

1.2.2.2 Allow the researchers to tackle the main problem into smaller parts.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

1.2.2.3 Dig deeper into the specifics of the main problem stated.

[One 1.5 space between last line and next 0.0 heading]

1.3 Goal of the Study

The goal or study plan is the expected output or result. This requires the author to explain how s/he plans to focus the studies on a particular purpose that will help him/her advance both academically/professionally upon completion of the course.

[1.5 spacing, Justified, Times New Roman, Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]

[One 1.5 space between last line and next 0.0 heading]

1.4 Research Objectives

1.4.1 The Objectives enumerate the **specific tasks** that would aid in attaining the goal of the research.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.4.2 These tasks should provide direction to the study.

[One 1.5 space between last line and next 0.0 heading]

1.5 Significance of the Study

The Significance of the Study discusses the specific contributions of the study and who will benefit from it. The approach can be from Macro to Micro (most important to least important; general scope to more specific, etc.) and vice versa.

[One 1.5 space between each paragraph]

[1.5 spacing, Justified, Times New Roman, Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]

[One 1.5 space between last line and next 0.0 heading]

1.6 Scope and Limitations

1.6.1 The Scope and Limitations give the parameters in which the study will be operating.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.6.2 These include the time and the spatial extents of the study. It may also include the theoretical limits of the study.

[One 1.5 space between last line and next 0.0 heading]

1.7 Assumptions

1.7.1 It is a statement that is understood to be true without proof in the study.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.7.2 An assumption is often confused with the hypothesis.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.7.3 Together with the Scope and Limitations, the Assumption helps in setting limits on the research to ensure that the study will focus on the specific problems that it aims to solve.

[One 1.5 space between last line and next 0.0 heading]

1.8 Hypothesis

1.8.1 The Hypothesis is an educated guess that predicts the outcome of the study.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.8.2 The hypothesis is a one to two-sentence supposition, an “If...then...” statement.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.8.3 The hypothesis is the starting point for the data-gathering.

[1.5 spacing, Justified, Times New Roman, Font size 12, whole paragraph is aligned to the heading number]

[No 1.5 space between last line and next 0.0.0 bullet]

1.8.4 The hypothesis must be testable and its results measurable. It is not something has to be proven true.

[One 1.5 space between last line and next 0.0 heading]

Summary of the Research

CHAPTER 2: REVIEW OF RELATED LITERATURE

[Students are free to customize the layout and page break for each chapter, as long as it is consistent and professional-looking]

[Chapter 2 can be partially done for ARESMETH]

[Page breaks shall not contain headers and footers]

- 5 Year Validity unless archival researches
- Per topic (with the synthesis at the end)
- 5-year validity in research, unless it is considered a “Pillar” source or well-known.
- At least 8 international sources, and 2 local sources (can be more)
- Case Studies are counted as 1 topic

2.1 Title of paper, Author/s, Book or Journal source, Year of publication.

[Single spacing, Times New Roman, Font size 12, Justified and aligned]

The Review of Related Literature (RRL) lists down the previous studies that have preceded or are relevant to the topic of the study. It gives a brief description of the related work and how the literature is connected to the study.

[1.5 spacing, Justified, Times New Roman, Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]

[One 1.5 space between each paragraph]

A synthesis of the literature cited may be included at the end in order to summarize the thoughts presented in the section. There can flexibility in the format of the RRL. Aside from the author-based listing and review, it can be based on the topics, chronology, and others.

[One 1.5 space between last line and next 0.0 heading]

CHAPTER 3: RESEARCH METHODOLOGY

[Students are free to customize the layout and page break for each chapter, as long as it is consistent and professional-looking]

[Chapter 3 can be partially done for ARESMETH, but Research Design must be completed]

[Page breaks shall not contain headers and footers]

[ARES METH ENDS AT CHAPTER 3, the rest shall be completed at Design 9A]

3.1 Overview

The Methodology provides a detailed account of the data gathering techniques, the materials used in the research, the time and date when the data were collected, and other pertinent data. The methodology is always written in the past tense.

[One 1.5 space between each paragraph]

The methodology describes the processes used in obtaining the necessary information and how they were processed to attain the goal and answer the questions given at the start of the study. Examples of methodologies that may be used are: a) Site selection criteria; b) Sampling method used (in case of surveys); c) Instruments and materials used; d) Sources of other data; and e) Procedures.

[1.5 spacing, Justified, Times New Roman, Font size 12, No indentation on the first line of paragraph, Aligned to the heading number]
